Nogs not included. Buy the nogs suited for the type of wall on which you are going to fix the pot (bricks, concrete, plasterboard, etc.).

ISTRUZIONI PER INVASATURA

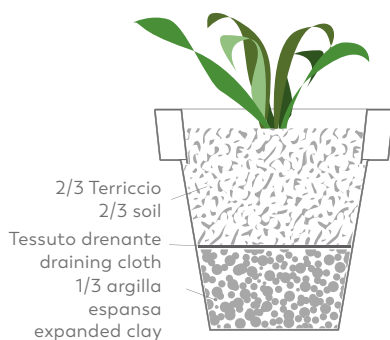

POTTING INSTRUCTIONS

Interno

Riempire il vaso con 1/3 in altezza di argilla espansa, posizionare uno strato di tessuto drenante e completare il riempimento con terriccio idoneo per la pianta da invasare. L'argilla espansa svolge la funzione di riserva d'acqua, tratteneendo l'umidità in eccesso e rilasciandola nel caso essa sia insufficiente.

Indoor

Fill the pot with 1/3 in height of expanded clay, put a draining cloth and complete filling with soil suitable for the plant to pot. Expanded clay has the function of water reservoir, holding excess wet and releasing it in case it is insufficient.

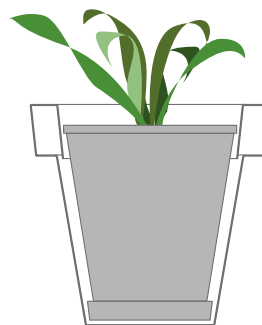

Portavaso

Infine i nostri vasi possono essere utilizzati come cachepot (portavaso). Sugeriamo l'utilizzo di un semplice vaso iniezione (plastica) con relativo sottovaso (opzionale).

Cachepot

Finally, our pots can be used like cachepot. We suggest the use of an injection pot with relative saucer (optional).

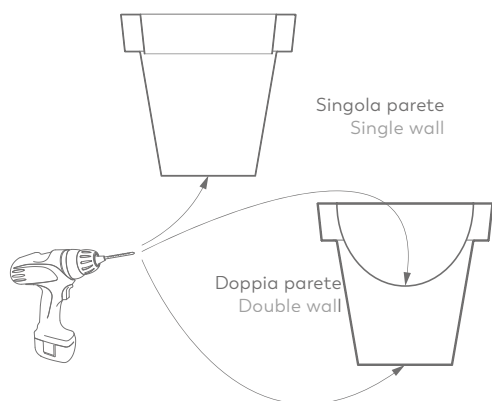

Outdoor

Il nostri vasi possono anche essere utilizzati come dei vasi di terracotta, praticando con un comune trapano un foro sul fondo del vaso (foratura Ø 6 mm circa). I vasi in doppia parete devono essere forati nella parte interna e sul fondo.

Outdoor

Our pots can be used like terracotta pots, drilling the bottom part (hole Ø about 6 mm). Double wall pots must be drilled in the inner and in the bottom part.
