# KHEOPE ROLLER R01

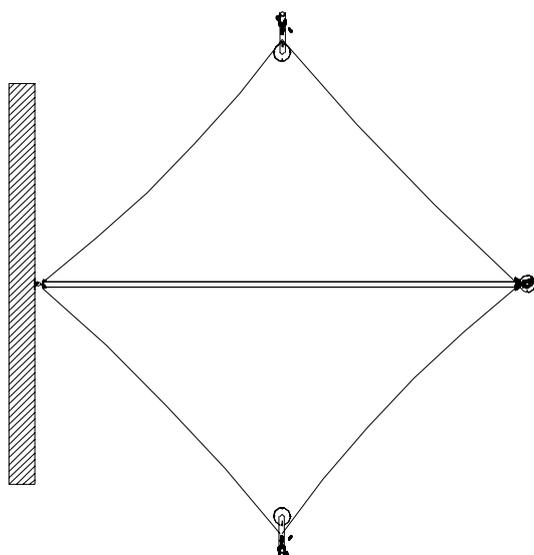

↔ 450x450

KHEOPE ROLLER, a real shading sail, manually retractable, of medium size that expresses modernity and ensures an important area of shade, representing an innovative choice for the covers of tomorrow. The stainless steel structure and the materials of the sail make the functionality absolute and the design light, modern, essential. Maximum dimensions 4500x4500 mm. Wind resistant up to class 1 according to EN 13561. It mounts 70 mm steel poles and 80 mm aluminum boom. Fixing to the building can be wall or ceiling through a system of stainless steel brackets. Anodized extruded aluminum alloy 6060 boom profiles, 304 stainless steel brackets, stainless steel hardware. Fabrics to be chosen among Dacron, Tempotest star resinato and Soltis 92 according to KE samples.

Sliding element for pole

**PICKLING** Pickling is the process that uses chemical means on the surface of a ferrous metal to remove a layer of oxide and slag. Basically, the workpiece is immersed in these acids which clean it of all the impurities it has collected and make it passive. That is, no longer reacting (or in a very limited form).

### MECHANICAL POLISHING

Mechanical polishing. It consists in removing material from the piece itself, through several grinding steps. So as to lower the level of surface roughness of the piece. Polishing of stainless steel surfaces requires the use of discs and synthetic abrasive pastes. The process makes the steel shiny and smooth the product undergoes salt spray testing in accordance with ISO 9227 to confirm the conformity and consistency of the process. The European product standard EN 13561:2015 defines corrosion resistance classes for the metal parts that make up the product according to the table below. The tests carried out on the coating of the components and profiles allow us to classify the product in the maximum attainable class according to EN 13561:2015, C2/4. 48 h. internal components, 240 h. external components.

### CORROSION RESISTANCE

Classes	1	2	3	4
Internal components	24	48		
External components		48	96	240

There is increasing demand for high-performance buildings that have a very low energy consumption and use energy derived from renewable sources. In particular, the limitation of solar heat gain is one of the most important aspects of summer thermal comfort. Solar shading plays an essential role in this concept. The gtot value determines the ability of the solar shield to maintain, in an environment directly exposed to solar radiation, a more comfortable temperature than that which would occur with the presence of glass alone. The solar heat gains are directly proportional to the total transmittance of solar energy gtot, a value that depends on the glazing and external shielding. The European product standard EN 13561: 2015 and the EN 14501 standard identify 5 energy performance classes as shown in the table below.

Effect of GTOT on thermal comfort					
Gtot value	$\geq 0,50$	$\geq 0,35 \text{ e } < 0,50$	$\geq 0,15 \text{ e } < 0,35$	$\geq 0,10 \text{ e } < 0,15$	$< 0,10$
Class	0	1	2	3	4
	very mild effect	Mild effect	Moderate effect	good effect	very good effect

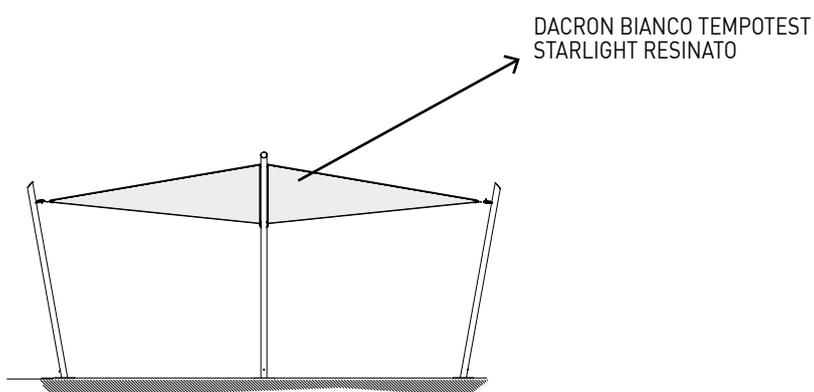

Each KE product has a Gtot value according to the shading fabric / profiles used. For details, refer to the information provided with the technical data sheet of the fabric and the CE label.

## FABRICS

Thermal comfort blends perfectly with beautiful style thanks to the more than 500 high performance fabrics available. A wide variety of colors, styles and solar shading factors allow for a system that meets your specific needs. All fabrics are CE Certified according to the EN 13561 and EN 14501 technical standards.

N.B.  
See the Fabric Guide for further fabric specifications.

CRI	85

### **EN ISO 9001**

KE has adopted a Quality Management System compliant with EN ISO 9001 requirements in order to maintain and increase quality and meet the highest customer expectations. This continuous improvement, through the control of all processes and careful evaluation of risks and opportunities, engages the entire organization in the development of systems to ensure the safety and reliability of the product and in the search for innovative solutions and technologies.

### **OHSAS 18001**

KE has activated a Safety Management System as an integral part of its work organization, committing itself to organizing the entire structure in order to pursue the objectives of continuous improvement in terms of safety and health protection. Training, knowledge and compliance with current legislation on health and safety at work, cooperation and collaboration and preventive activities are actively pursued in order to minimize the possibility of non-compliance.

### **EN ISO 14001**

KE is ISO 14001 certified for environmental management and strives to be an example of respect for environmental resources and for the continuous improvement of its environmental management system. It is committed to continuous improvement and pollution prevention in compliance with applicable laws, regulations and standards; systematically detects any environmental impact of manufacturing processes, promotes the culture of recovery and recycling in the company and in the related production chain.

### **CE MARK \_ EN 13561**

The CE marking of outdoor awnings is a signal to the Consumer that the product can be sold freely in the EU single market, as it complies with Community provisions which recognize safety as the priority of every product that has this agreed upon reference standard. Verification of wind resistance capacity and the clear indication of the ability of the awning to contribute to the energy savings of the building (Gtot), are some of the commitments that the manufacturer makes to a product that has earned the CE marking. The name of the manufacturer, the reference standard (in our case EN 13561) accompany a product that is properly adapted to European indications.

### **CE MARK \_ EN 1090-1**

KE extended the CE marking in 2015 to stationary awnings, which are among the aluminum structural components covered by the international standard EN 1090-1. This marking reflects our use of rigorous structural design and manufacturing with qualified processes, adequate industrial resources and qualified personnel.

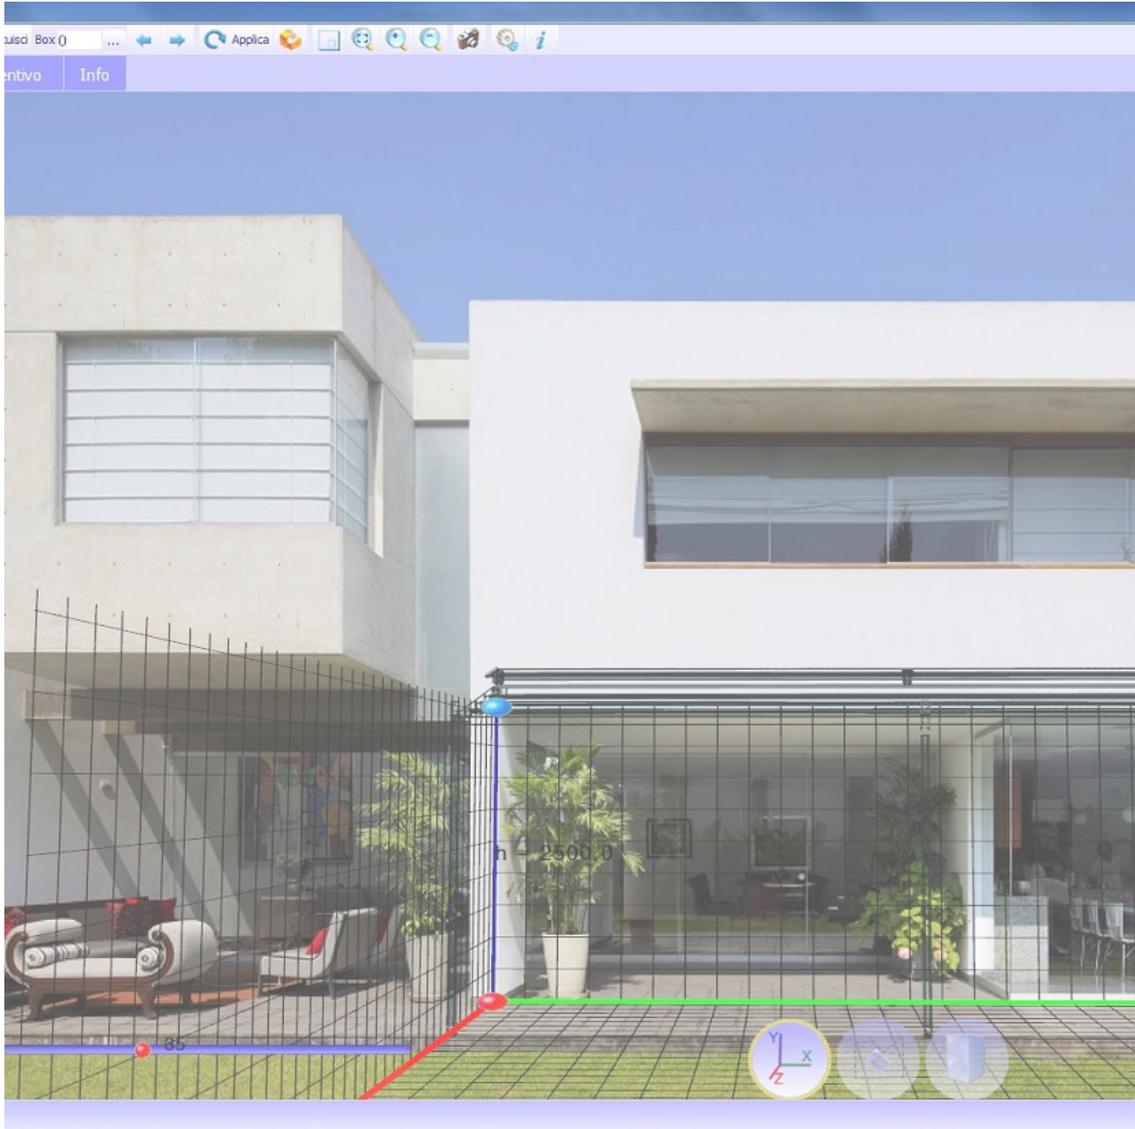

## VIRTUAL SHOW ROOM

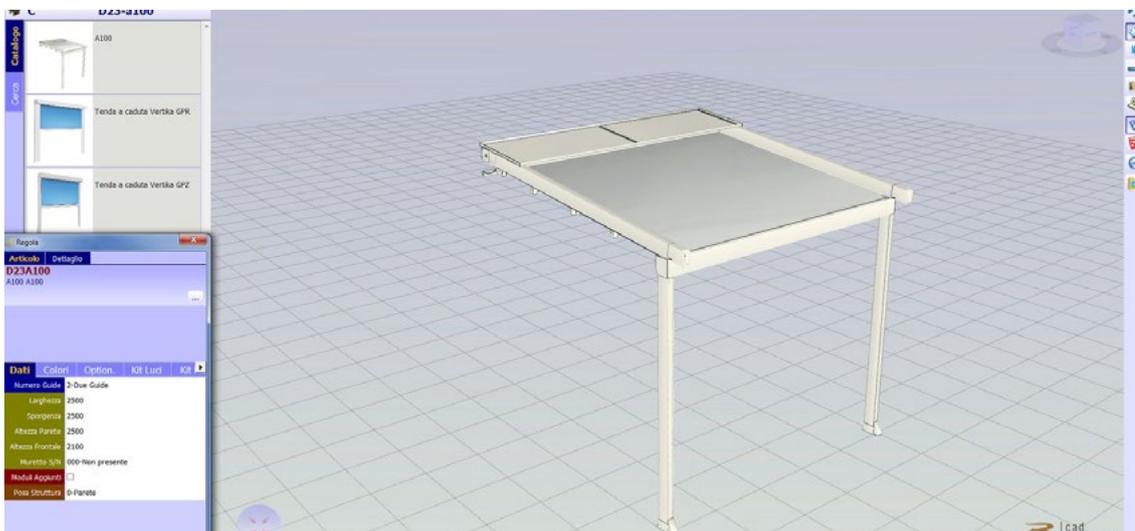

KE has adapted to the new ways of using the product by working on a digital showroom that is able to give the user a high-impact visual experience, a functional space where they can move around freely, receive detailed information on products with a simple click, and access content of interest quickly and intuitively. There is viewable content such as augmented reality and downloadable files such as data sheets, brochures and 3D models.

**KE**  
ENJOY THE OUTDOORS

The KE B2B order system is a simple and intuitive service for placing orders conveniently online. An attractive graphic design, numerous functionalities and an easy and intuitive use mode that allows to access in real time to all the information related to the history of the orders and to the processing of the current ones. With the Cad Lite 3D Configurator you can configure Genius and Bioclimatica models thanks to a constantly updated online catalogue. Thanks to an easy-to-use interface, it also allows you to formulate a complete quote with minimal error.

## Ambienti

La nostra missione è creare nuovi spazi outdoor da vivere in totale armonia. Grazie alle nostre **coperture solari** e alle **strutture per esterni personalizzate**, potrai **arredare con stile il tuo terrazzo, giardino, attico, ma anche modulare...** [Leggi di più](#)

BIM technology improves the working method of designers and is now the main source of information for the realisation of a project. With BIM the model is generated in a "parametric 3D" from which a series of information such as 2D views, elevations, sections but also metric calculations and much more can be automatically derived. On the KE website you can find the BIM gallery of the main KE models, the certifications and all the useful technical documentation for each product: [www.keoutdoordesign.com](http://www.keoutdoordesign.com)

POWERED BY SYNCRONIA

## A GROUP, A VISION, A GROUP IN EVOLUTION

Since 1987, KE has been designing and manufacturing arm awnings, cassette awnings, drop awnings, canopies, shelters and is specialised in shading structures that enhance the liveability of outdoor spaces, up to the redesign and restyling of urban furniture. Both for the variety of the range and the depth of the configurations, KE is a manufacturing reality able to satisfy the most demanding requests the most demanding requirements of designers, architects, window and door manufacturers, upholsterers and outdoor professionals.

## Improving the experience

With KE's professionalism and experience you can rely on quality products designed to enhance your customers' outdoor experience. With KE it will be easier to live the outdoor space in perfect harmony with the surrounding environment, widening the viewpoints and ensuring maximum comfort in all seasons. all seasons.
